

Newton AMS: Report Card

A module-by-module read of what's actually running in production versus what's been built but sits unused. Compiled from a live walkthrough of the admin panel, not from the spec.

Organization: **Idara Al Khair** Source: **sms.idaraalkhair.sbs/admin** Reviewed: **26 screens, 21 Jul 2026**

REPORT CARD GRADE D+ on the scale below — not a pass	BUILT & DESIGNED ~88% every screen exists, polished UI	ACTUALLY LIVE ~42% producing real, current data
---	---	--

The system is **almost fully built** — dashboards, fees, attendance, results, timetables, staff and student profiles all exist as finished screens. But **most of it is standing empty**: four whole modules (Fees, Staff Attendance, Behaviour Tracking, Timetables) show zero real data anywhere, and even the best-used module — Student Attendance — has three of seven campuses not reporting and hundreds of missing days elsewhere. The dashboard's Attendance widget, flagged broken in the first pass, is confirmed live on re-check (83% avg attendance, all weekdays populated). Grade scale: A ≥90% live · B 75–89% · C 55–74% · D 35–54% · F <35%.

Campus Rollout — Attendance

7 real campuses · Campus 9 excluded (testing)

Campus 1 NOT LIVE	Campus 2 83.7%	Campus 3 63.1%	Campus 4 NOT LIVE	Campus 5 NOT LIVE

Campus 6

83.9%

Campus 7

NOT SEEN

Campus 8

90.7%

Campus 1, 4 and 5 show a bare "—" for attendance in the org dashboard — confirms what was flagged verbally: implementation hasn't reached those three yet. Campus 7 never appeared in any of the 26 screens reviewed; worth confirming it's configured at all before scoring it.

Module Ledger

15 modules reviewed

MODULE	STATUS	GRADE	LIVE %	REMARKS — WHAT THE SCREENS ACTUALLY SHOW
Org Dashboard & Analytics	● LIVE	B	~80%	Enrollment, gender, religion, grade-distribution charts all carry real figures across all 5,350 students.
Dashboard Attendance Widget	● LIVE	B	~83%	Corrected on re-check: gauge shows 83% avg attendance with all six weekday bars populated (up to 2,564). The 0%/empty screen seen in the first pass was a transient load issue, not a broken widget.
Result Management (network view)	● PARTIAL	D	~45%	Inter-campus comparisons only ever surfed up 2–5 of the 7 campuses at a time; most subject cells for the rest read "—".
Result Approval Workflow	● NOT LIVE	F	~5%	Every grade/section card reads "Passed (or Failed) 0 · Performance 0%" — nothing has actually been approved through it.
Grade Progression Analytics	● BLOCKED	F	0%	The system's own message: "Needs two years of enrolment snapshots — fills in once 2025-26 snapshots exist." Structurally can't work yet.
Fees Management	● NOT LIVE	F	0%	Fully built UI — structures, fee types, verified payments, bank accounts — but billed, received and collection rate all sit at Rs 0.00. "No recent transactions."
Staff Attendance (manual)	● NOT LIVE	F	0%	Checked on two different campuses (8 staff, 51 staff) — every single record reads "Not Marked." Nobody is using it.
Biometric Device Integration	● NOT LIVE	F	0%	"No Biometric Devices Found" — no hardware has been registered for any campus or organization.
Employee Timings / Shift	● NOT LIVE	F	0%	Arrival/departure fields blank for every employee; "No Time Periods Yet" on the

MODULE	STATUS	GRADE	LIVE %	REMARKS — WHAT THE SCREENS ACTUALLY SHOW
Timings				timetable builder.
Student Attendance (daily marking)	● PARTIAL	C	~60%	Real percentages where it runs (83–84% but 31 classes went unmarked for 628 days in one month alone; one class shows 0% the whole month.
Student Behaviour / Performance	● NOT LIVE	F	0%	Punctuality, Obedience, Class Behaviour, Homework, Respect all blank — the radar chart plots nothing. Every profile checked reads "Performance/Behaviour: 0%."
Teacher & Student Profiles	● LIVE	B–	~75%	Mostly real and populated, but some fields are clearly placeholder (phone "03000000000", a DOB that matches a joining date).
Announcements	● TEST DATA	D–	~15%	Live entries are things like "Meetinh" (×3) "hjhcskchhcskc" — internal testing, not real communication to staff or parents.
Recent Activity / Audit Log	● WEAK	D–	~20%	Feed is dominated by repeated "Password_change record" entries; real operational activity (admissions, payment) barely surfaces.

For the Implementation Team

grouped by urgency

NOT STARTED — NEEDS BUILDING OR CONFIGURING

Fees Management

Zero live records anywhere. Confirm whether structures were ever set up for any campus.

Staff Attendance

No biometric devices registered, no employee timings set, and manual marking isn't happening — pick one path and land it.

Timetables / Shift Timings

BUILT, BUT NEEDS A FIX OR A PUSH

Result Approval workflow

Built end-to-end but nothing has been approved through it — check if campuses know it exists.

Attendance compliance

628 missing class-days in one month is a process gap as much as a software one — needs reminders or an escalation path.

Announcements & Activity Log

Clear out test entries before this goes in front of parents or staff.

Empty on every campus checked — nothing to review yet.

Student Behaviour Tracking

The UI exists but has never been filled in by any teacher — needs either a rollout push or a decision to shelve it.

Campus 1, 4, 5 — Attendance

Confirm these are next in the rollout queue, matching what was flagged.

Campus 7

Didn't appear in any screen reviewed — verify it's actually set up.

Compiled from 28 admin-panel screenshots supplied for review — not from source code or specs. Rev. 2: Dashboard Attendance Widget corrected from "Broken" to "Live" after fresh screenshots showed it populated (21 Jul 2026, 9:05 AM).
